The hue and cry raised about women carrying their pocketbooks in their hands leads to the question, where shall they carry them? If in the pocket of a coat they are just as much a temptation to the dishonest passer-by, and, if put down in the pocket of a gown, a woman could not get at them. Some people say fasten them inside the frock, but imagine the embarrassment that would cause a busy shopper, for, unless she sent home everything C. O. books?

A fifteen-inch square of red cheese cloth, with narrow, brier-stitched hem and two strings of worsted braid sewed across one corner, does not sound like anything remarkable, but when one learns it is to wrap up shoes or slippers for bag or trunk the full value of the notion appears. Shoes are the meanest things to pack or wrap in paper, but the soft cotton wraps them close and the strings keep them in place.

Soup Stocks. There are a number of methods of making soup stocks, and no two will give exactly the same results. One of the simplest and most satisfactory is that of clear stock, or bouillon. By this the best flavor of the meat is obtained, for none passes off in steam, as when the meat is boiled rapidly. The second mode is in bolling the stock a great deal to reduce it. This gives a very rich soup with a marked differ ence in the flavor from that made with clear meat kept in water at the boiling

stock, which will not be clear unless whites of eggs be used. In following the first method we buy clear beef specially for the stock, and know from the beginning just how much completed by the second method we we estimate may boil away. The third of meat left from roasts and from the Beat the yolks thoroughly and trimmings of raw meats, will always be
